

# **Dongfang Honghua Staged on OTC Expo!**

The great exhibition -OTC Expo 2024 have been hold on May 6 in Houston. There is a professional service team with shipshape uniforms standing on booth with high-tech production. ---That is Dongfang Honghua from China.As one of the leading enterprises in the global high-end petroleum equipment manufacturing industry, Dongfang Honghua, a subsidiary of Dongfang Electric Corporation, reappeared at the exhibition with multiple high-quality products, demonstrating Dongfang Honghua's advanced products and strong technical strength. The exhibition brought together energy companies from more than 100 countries and regions around the world, with more than 1,300 exhibitors.

At the exhibition, Dongfang Honghua exhibited multiple products with leading technology and highly automatic features including Honghua's smart rig, HH5000 truck-mounted fracturing pump, HHF-2000 triplex mud pump, and HH2400 quintuplex mud pump etc, which attracted the attention of petroleum enterprises and industry experts all over the world. These products have been widely used around the world and highly praised by customers. Dongfang Honghua team made customers to better understand the product characteristics and performance through the way of "product model display + real-time explanation". Customers have shown a high interest in product technical parameters and operational performance.

### **Smart Rig**

Dongfang Honghua smart rig has realized the automation, remote and intelligence drilling operations through automated and intelligent ground surface equipment, downhole tools, and signal transmission technology, as well as OPERA system and Drill studio. This means that the drilling rig can automatically complete drilling operations, while achieving remote monitoring and intelligent control, making the drilling process safer, more efficient, and more convenient.

### **HH5000 Truck-mounted Fracturing Pump**

The truck-mounted fracturing pump is designed specifically for unconventional oil and gas exploration such as shale gas and coalbed methane. It adopts advanced VFD system and intelligent

control technology, which can achieve higher efficiency and more precise control. The pump's high-strength steel and excellent high-pressure fluid components ensure its durability and stability and can quickly adjust pressure and flow in seconds, ensuring the stability and safety of oil and gas exploration, and improving exploration efficiency. The launch of HH5000 truck-mounted fracturing pump demonstrates Dongfang Honghua's leading position in technology and innovation, bringing more efficient, safe, and intelligent solutions for the global oil and gas exploration market.

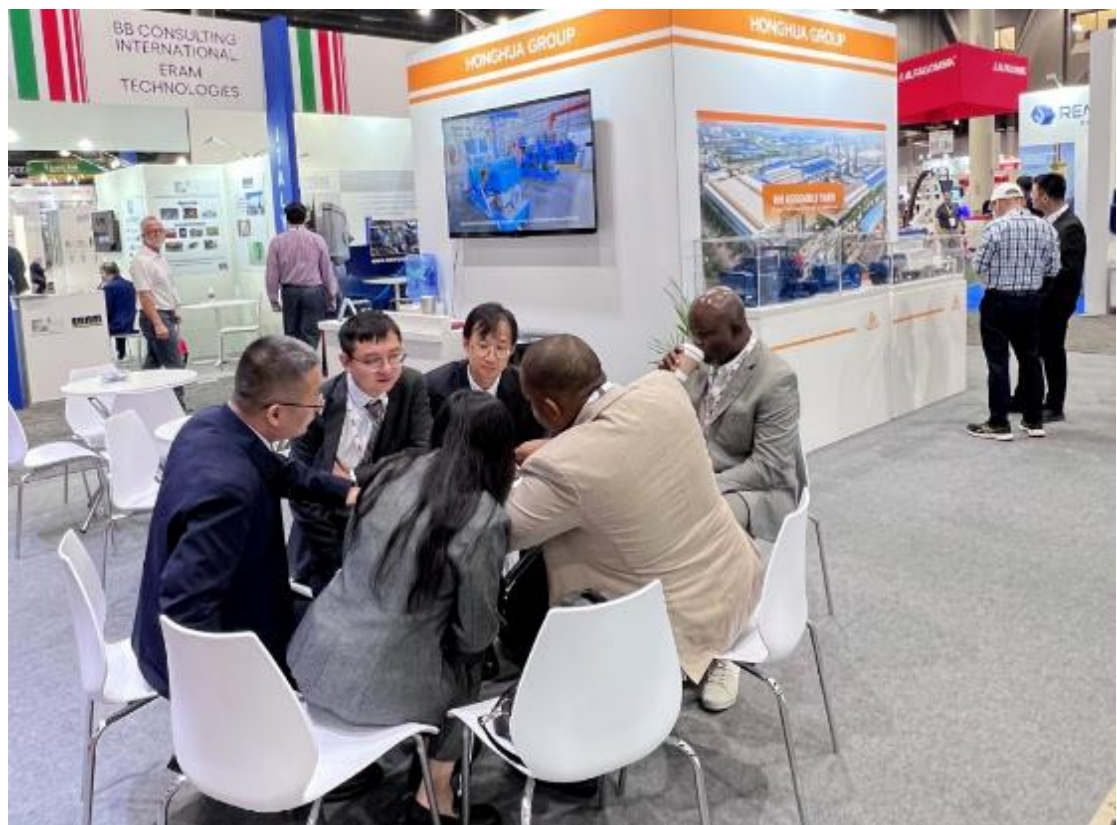

Dongfang Honghua not only has core competitiveness in high-end petroleum equipment manufacturing, but also has established a strong after-sales service network worldwide, covering over 30 countries and regions with rich oil and gas reserves worldwide. Honghua owns a professional team that provides timely technical support and service guarantees for global customers, including customized services, pre-sales and after-sales services, oil and gas field engineering services, testing services, training services, etc. We have formed an after-sales service system with "1-hour response, 8-hour coverage of Sichuan and Chongqing region, 1-day coverage of China, and 2-day access to the world", committed to providing customers with efficient and reliable customized services and solutions.

During the exhibition, the marketing and technical team of Dongfang Honghua had sufficient and deep communication with customers to ensure that they fully understood the performance and solutions of Honghua's products. Customers have highly praised Honghua's technical strength and service level.

In the future, Dongfang Honghua will always put customer

needs first, continuously improve product technology and service quality to create more value for customers and achieve common development goals. It would become the most trusted partner for customers, and contribute more power to the global oil and gas equipment industry development.

### **Note**

OTC (Offshore Technology Conference) is one of the world's leading exhibitions in oil and gas industry. Since its establishment in 1969, it has attracted industry experts and entrepreneur all over the world. The exhibition covers various fields from Exploration, Production, Processing and Transportation and demonstrates the latest technology, equipment, and services. As one of the largest and most influential events in the industry, OTC provides exhibitors with an important platform to showcase the latest achievements, explore markets, and establish cooperative relationships. At the same time, various technical forums, seminars, and professional training have promoted technological exchange and experience sharing within the industry, promoting sustainable development and innovation in the field of oil and natural gas industry.
